

Worksurface Sit-to-Walkstation, Universal® | Seating Leap®, Scoop Stool
 Space Division Answer® | Storage Universal®, Details Worktools, Elective Elements® 6

- Today's approach to ergonomics is not about static postures, but about movement throughout the day. Height-AdjuTable worksurfaces give users control, help support collaboration and promote healthy workstyles.
- Panels provide standing height privacy and create a boundary for integrated team spaces to accommodate collaborative and problem solving discussions.
- Storage towers with open shelves form boundaries while creating surfaces for piles and visual display, allowing users to access materials while seated or standing.
- The Cableway tucks away technology in an accessible "pocket" while keeping the area under the worksurface clutter free.
- The Walkstation lets users walk comfortably, burn calories, feel healthier and more energized, all while accomplishing the work they'd normally do while seated.
- Slatwall supports a variety of worktools and frees up space on the worksurface.
- FYI™ monitor arms support healthy postures and make it easy to share what's on screen with others.

Planning Principles

■■■ Balances Privacy ■■■■ Manages Connections ■■■■ Supports Diverse Workstyles
