

Worksurface Series 7, Walkstation, Universal®, E-Tables, Enea Seating Leap®, Bob Lounge, Enea, Sidewalk™, Siento™ | Space Division Montage®, Post & Beam, Groupwork™ Screens | Storage Universal®, Details Worktools

- Today's approach to ergonomics is not about static postures, but about movement throughout the day. Height-AdjusTable worksurfaces give users control, help support collaboration and promote healthy workstyles.
- Zone A: Straight worksurfaces provide large flat surfaces for piling and mobile tables provide additional space for active work and collaboration. Larger corner workstations support side-by-side collaboration and allow users to fine-tune their orientation. This pod combines the highly mobile user (e.g. project manager) with other team members of differing disciplines.
- Zone B: The Walkstation lets users walk comfortably, burn calories, feel healthier and more energized, all while accomplishing the work they'd normally do at their workstations. A Walkstation conference room creates a space for stand-up meetings where all participants can actively move and interact.
- Panels with glass sections allow the workspace to feel more open.
- Mobile screens and scrims provide privacy for Walkstation users.

Planning Principles

■■■■ Balances Privacy ■■■■ Manages Connections ■■■■ Supports Diverse Workstyles
