Height-Adjustable Thought Starters

details-worktools.com

Worksurface Series 3, Airtouch™ | Storage Convene™ | Seating Think®

- Classrooms should better enable technology and improve users' comfort and performance. Today, we're seeing a shift from traditional ergonomics to a more proactive solution that encourages healthy living...one that focuses on the physical, cognitive and social needs of today's workforce.
- Series 3 provides seated height-adjustment which gives classroom users control and promotes healthy workstyles.
- Airtouch easily adjusts from seated to standing height and supports the computing activities of the presenter.
- Modesty Screens provide below worksurface modesty in a freestanding environment.
- The Cableway tucks away technology in an accessible "pocket" while keeping the area under the worksurface clutter free.
- Eyesite™ ensures that the user remains in the active work zone: On-center mounting for straight forward or straight back movement means the technology adjusts to the user rather than forcing the user to adjust to the technology.
