

Thought Starter Design Tips. Avoiding pinch points.

details®

Pinch Points: a few helpful pointers to keep designers out of a pinch.

Width

Details worksurfaces are listed in actual widths. It is important to specify a minimum 1" gap to adjacent furniture. This eliminates any pinch points between a Height-Adjustable worksurface and a fixed object.

Depth*

Details worksurfaces are listed in actual depths. The feet of Series 3, 5 and 7 extend 1" beyond rear worksurface edge to eliminate pinch points and add clearance for cable access.

Note: Installing Cableways and Screens will effect the rear pinch point (i.e. ACMPxx sits 2" from the rear of the worksurface). Please plan the space accordingly.

* Airtouch has varying back pinch points depending on the worksurface configuration.

Obstructions

Moving tables can collide with other objects. Do not install overhead storage, pedestals or stationary components in the path of Height-Adjustable tables.
