Height-Adjustable Worksurfaces | Series 5

We're giving you a new way
to manage change.

It's called "easily."

Jana, 5' 2" short

David, 6' 4" tall

Welcome to a workplace world in flux.

An “un-cubed” world.
A place where more people are making more moves into less space than ever before.

Series 5 is a full sit-to-stand electric height-adjustable worksurface that easily moves for people who need to. And helps to contain the cost of those moves while delivering a complete range of ergonomic postural benefits.

Some companies are fixated on fixed-height furniture.

But what if ...

... Height-Adjustables could actually help to reduce the cost of churn?

... Height-Adjustables could significantly reduce your real estate footprint?

... Height-Adjustables could help to reduce medical claims?

... Height-Adjustables could pay for themselves in less than two years?

Simply theoretical?
Not at all. Learn how to put theory into practice.

Read “The Case for Height-Adjustability” (AdStock # 08-0000915). Ask your Details representative or Steelcase Dealer for a copy. Or see it online at the Details web site (www.details-worktools.com).

Movement throughout the day...
it's healthy and productive.

Today's furniture is not about static postures and static thinking. It's all about movement.
Series 5 delivers the motion and emotion that helps to bring health to workers and the workplace.

What workplace couldn't stand for more productivity?

Standing work breaks (from sitting) substitute for nonproductive work breaks (away from work area) in alleviating fatigue. The result is decreased time away from task accomplishment and, thus, increased productivity... 55% showed increased productivity through reduced work break time.

Key features keyed to Series 5.

- ① Add the right optional tools – SlatRail, worktools, Privacy and Modesty Screens, Cableway, flat panel arm, cpu holder, task lighting – and the fully adjustable worksurface becomes a fully adjustable workstation.
- ② Instant and easy adjustability with simple push button control: up or down @ 1.7" per second.
- ③ Height Range adjusts from 25½" to 52".
- ④ Robust and sturdy: distributed 220 lbs. dynamic load-bearing capacity*.
**Includes weight of the worksurface (approximately 24-110 lbs. depending on table size).*
- ⑤ Telescoping stretcher adjusts to accommodate a number of different worksurface widths and allows for on-board CPU storage (dependent on width).

So many ways to go.

Here's a little illustration that simply scratches the surface of new ways to think about space design. Details has a full packet of Thought Starters that explore many more different ways to look at space. Order Adstock # 08-0001038 or ask your Details representative or Steelcase Dealer for a complete collection of Thought Starters. Also available online at the Details web site (www.details-worktools.com).

Worth its weight.

Series 5 has a distributed 220 lbs. dynamic load-bearing capacity*... enough to take on flat panels, flat panel arms, CPU's, all the work-tools you'll ever need and even Jana.

**Includes weight of the worksurface (approximately 24 -110 lbs. depending on table size).*

Series 5. The competitive edge.

Telescoping Stretcher

One base may be used with many different sized worksurfaces; accommodates CPU storage.

According to ANSI/BIFMA guidelines, the knee clearance should meet or exceed 17". Series 5 meets it!

Urethane Edge

Front edge has a Urethane profile to provide an ergonomic edge for keying and mousing.
Urethane edge is a standard special.

Universal Worksurface Edge

Universal worksurface has radius corners to eliminate sharp edges.

A healthy set of features.

08-000056

Slatwall Stanchions have clean lines and universal application across the entire spectrum of free-standing furniture.

08-000733

Optional Cableway houses excess technology wires in an out-of-sight yet accessible "pocket."

08-000734

External motor allows easy access.

06-000462

The touch of an index finger instantly makes all the height adjustments at 1.7" per second.

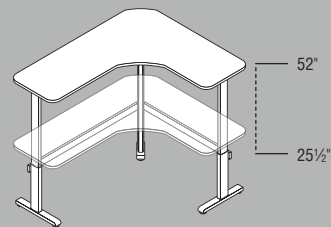

08-000732

Feet extend 1" beyond rear of work surface edge to eliminate pinch points and add clearance for cable access.

Obligatory and important basic feature information.

- 25½" to 52" electric height adjustability range (assumes 1" glide adjustment)
- Infinite height adjustments within the range
- Low surge electric motor with quiet operation, adjusts @ 1.7" per second
- 2½" diameter glides have 1" of glide adjustment for surface leveling on uneven floors
- Lifting columns controlled by "master" and "slave" motors
- Trough provided to manage excess base controller wires
- External DC motor
- Worksurfaces are available in two styles: Universal & Urethane Profile (standard special)
- Worksurfaces ship with pre-drilled holes for ease of installation.
- Flush mounted work surface bracing (for two-piece tops)
- All assemblies meet or exceed ANSI/BIFMA standards

Range: 25½" to 52".
Some others don't measure up (or down) to Series 5's full range of adjustability.

For a full list of Standard style numbers, pricing and all specification information please see the Details SpecGuide or go the Adjustables page on the Details web site (www.details-worktools.com).

You want shapes? OK. You want sizes? OK.

Infinite variety might be overdoing it a bit. But there are simply so many ways that Series 5 lets you re-shape space without walls or restrictions.

Please see the Details web site (www.details-worktools.com) for additional sizes available as Standard Specials.
