

Executive Office Tools designed by **Foster + Partners**

Cleaning Instructions

These products are generally stain resistant to most compounds or staining agents found in the office, food and health care industries. Most food condiments such as ketchup, mustard, steak sauce, etc will clean up easily. However, bacteriostatic agents such as Iodine and Betadine have the greatest staining potential and care should be exercised to avoid exposing this product to these as such stains can usually be only partially removed.

When cleaning, avoid using harsh cleaners with abrasive additives. Never attempt to use sharp metal objects or sandpaper to remove stains. Do not use bleach to clean the surfaces. Do not use hard bristle brushes. All of these will cause permanent damage and will void the warranty.

Ordinary soiled surfaces caused by normal use can be cleaned with a damp cloth or sponge and Formula 409® added as required. For severe stains, if a scrub brush is used, make sure it is a soft bristle type to prevent scratching. Successive cleanings may be required using a soft bristle brush and 70% Isopropyl Alcohol.
