details

enhancing the wellbeing of healthcare workers and their patients.

The delivery of healthcare today requires the physical space to be part of the team. Efficiency and functionality are imperative as is flexibility to meet the needs of a wide range of care professionals and the ever evolving technologies they employ.

Details, a division of Steelcase, Inc. brings knowledge and products to the healthcare workplace to help organizations respond quickly to people, process and workflow changes. We know that giving the care professional the ability to quickly move, adjust or re-orient technology and work zones ensures worker comfort, efficiency and accuracy.

Radiology

Electronic medical information, along with technologies employed to capture images, diagnose and treat patients, are making radiology professionals some of the most extreme users of computing hardware in healthcare. As such, it is extremely important that the radiology workspace be one that can quickly adjust to counter static postures for every occupant over multiple shifts. Flexibility in worksurface height, monitor position and lighting levels all help to create supportive, ergonomic work environments.

Telemetry

Telemetry information is needed by multiple users throughout multiple shifts. Details precision-balanced Height-Adjustable Worksurfaces give a dedicated telemetry tech the ability to vary their posture, from seated to standing, to reduce fatigue induced by lengthy static seated positions. Monitors can be quickly adjusted for one or multiple users.

SOTO™ Display Shelf

Glove Box

Chart Holder

Telephone Caddy

Healthcare work is both hectic and challenging. The physical environment needs to be an ally that helps with multitasking on the go. The workspace needs to help maintain organization and support effective care delivery.

So, whether you're trying to make the process visible or simply make maximum use of vertical real estate to reduce clutter, the workspace must work as hard as your clinicians.

Details offers a variety of Organizational Worktools, such as document holders, markerboards, glove box holders, telephone caddies and more. Our worktools can help put order into the healthcare workplace.

SOTO™ Extended LED

Kast™

Mini SOTO™ LED Light on Single Arm Pole Mount

In a 24/7 healthcare facility it's sometimes hard to adequately solve the lighting needs of clinicians without unnecessarily disturbing a patient. It can be a challenge to anticipate lighting needs and solve them with architectural solutions.

The Details portfolio of energy efficient LED Task Lights can illuminate touchdown points throughout the healthcare facility. Details offers lighting solutions for nurse stations, administrative offices, waiting areas, and other on-carpet areas.

FYI® Single Flat Panel Monitor Arm with Sync Handle and Mini SOTO™ LED Light

Eyesite™ Single Display Support with focal length adjustment handle

Vertical Processor Sling

Classic Rectangular™ Keyboard Platform

Information access is a critical part of effective healthcare delivery. Care teams need to see, input, and access information to support the best possible outcome. Just as patient care relies on multiple experts and multiple technologies, there is a wide range of user

needs and preferences in terms of how they engage with these tools. Details' knowledge and line of products, support technology without forgetting the needs of the user, as well as the IT people who keep it going.

Airtouch®

Series 7 Controller

Healthcare is a fast pace, high stress business. It often relies on space to accommodate multiple users over multiple shifts. Whether giving a desk-bound telemetry tech the ability to stand

to re-energize or to provide a range of seated posture options for a diverse workforce – worksurface adjustability is required.
