

Light-Duty Arm

Customer Needs:

To support flat panel monitors in a workstation environments. Particularly important to users in workstation environments which offer limited space and /or non-height adjustable workspaces. Also applicable to multi-user workstations due to the ease of adjustment and storage when not in use.

User Requirements:

- Ease of positioning of a flat panel monitor across a broad range of adjustment.
- Allows ease of height range and viewing angle changes.
- Allows monitor to be positioned at the correct viewing distance to relieve eyestrain.
- Frees valuable workspace space that was previously unusable.
- Allows for the design of a smaller workspace footprint to be specified effectively yielding more square footage.

Product Features
