

# Maximum output. Minimal effort. Minimal size. Mini SOTO.™

So small. So much. So simple.

Need to shed a little light on the subject? The **Mini SOTO LED** Task Light has all the intelligence and design integrity of its parent: the freestanding or rail mounted SOTO LED Task Light. So many uses; so simple to mount.

The **FYI® Bracket** enables the addition of low voltage LED lighting on a worksurface below a flat panel display. Especially applicable in healthcare environments, it reduces overall energy usage by delivering light where it is most needed.
